

THE PUBLIC PRINTING.

ANNUAL REPORT

OF THE

SUPERINTENDENT OF PUBLIC PRINTING,

SHOWING

The condition of the Public Printing and Binding.

JANUARY 20, 1864.—Laid on the table, and ordered to be printed.

OFFICE SUPERINTENDENT PUBLIC PRINTING,

Washington, January 20, 1864.

SIR: Herewith is submitted the eleventh annual report of this office, showing the condition of the public printing, binding, &c., in order that it may be laid before the House.

Very respectfully, your obedient servant,

JNO. D. DEFREES,

Superintendent Public Printing.

Hon. SCHUYLER COLFAX,

Speaker of the House of Representatives.

OFFICE SUPERINTENDENT PUBLIC PRINTING,

Washington, January 20, 1864.

The following report of the "exact condition of the public printing, binding and engraving, the amount and cost of paper and materials purchased, and the number of hands employed," is submitted to Congress in compliance with the provisions of the joint resolution in relation to the public printing, approved on the 23d of June, 1860.

The last annual report contained the transactions of this office during the year commencing on the 1st of October, 1861, and ending on the 30th of

September, 1862. The present report is of the transactions for the year commencing on the 1st of October, 1862, and ending on the 30th of September, 1863.

During the last year the amount of printing required by the Government, and especially by the Executive Departments, has been very great, much greater than at any former period. The necessity for this increase, it is needless to say, is to be found in the existing condition of the country.

The following table of the disbursements for the years 1862 and 1863, respectively, will show the extent of the increase :

	1862.	1863.
Public printing, including labor and materials,		
except paper	\$172, 531 02	\$285, 664 80
Paper for the public printing	206, 437 21	*830, 802 06
Lithographing and engraving	23, 739 27	64, 126 38
Public binding, including labor, machinery and		
materials	146, 682 63	223, 945 80
	<u>549, 390 13</u>	<u>1, 404, 539 04</u>

To meet this increased demand for printing and binding, I have been compelled to add to the machinery and materials to so great an extent that there is no room in the building for any more, and yet much more could be profitably employed if the present amount of work is to continue. To facilitate the work as much as possible I have employed, during the past year, several presses in some of the private printing establishments in this city, and yet there are several large documents ordered by Congress which are unfinished solely for the want of room for additional presses.

In view of these facts, I respectfully submit to Congress the propriety of making an appropriation to enlarge the building and to increase the machinery and materials of the establishment, as I am confident it would result to the pecuniary advantage of the Government.

Under the law I am compelled to execute the orders of Congress and of the Departments, and can have, of course, no control over the amount ordered to be printed ; but I hope it may not be regarded as improper for me to suggest that a great saving to the Government may be made by omitting to print many documents which are of no general utility, and to ask the attention of Congress to the subject.

The increased cost of labor and materials of all kinds has, of course, added greatly to the cost of the printing and binding done during the last year ; yet, the saving effected over the prices paid under the old system has been very considerable, as will be seen by reference to the tables herewith submitted.

* The paper remaining on hand, however, on the 30th of September, amounted to \$253, 372 38.

Detailed statements showing the quantity of work executed during the year ending on the 30th of September, 1863, are appended hereto, as follows :

- No. 1. Showing the cost of the printing (exclusive of paper and engravings) if charged at the prices established by the printing act of 1852.
- No. 2. Showing the cost of the same printing under the present system.
- No. 3. Showing the disbursements for paper for the public printing.
- No. 4. Showing the disbursements for lithographing and engraving.
- No. 5. Showing the disbursements on account of the public binding.
- No. 6. Showing the cost of the same binding at the prices allowed previous to the establishment of the government bindery.
- No. 7. Showing the number of hands employed, and the amount paid each.

THE PUBLIC PRINTING.

By this term must be understood that portion of the work coming directly under my own control ; the employment of workmen, and the purchase of the necessary machinery and materials, except the paper and engravings. The orders for printing emanating from the executive and judicial departments, forming now much the larger portion, are filled as rapidly as possible, and, I think, without unreasonable delay. Being usually of great urgency, and finding it utterly impossible to complete them as required for the public service, and at the same time finish the documents ordered by Congress, I very reluctantly suspended the printing of some of the least important of the latter. The documents which, in part for this reason, are yet unfinished, are as follows :

Report of the Commissioner of Patents on Arts and Manufactures.—This report will embrace descriptions and engraved illustrations of the patents granted in the years 1861 and 1862, and will make four volumes, 41,550 copies of each of which are ordered to be printed, making 166,200 volumes to be printed and bound. One volume of this report has been completed ; another is printed and nearly ready for binding ; the engravings for the third are finished, though not printed ; and the fourth has not yet been commenced. It will probably have to remain in its present condition until after the adjournment of Congress.

Report of the Commissioner of Agriculture.—This report is comprised in a single volume of 632 pages, 131,550 copies of which were ordered to be printed. 100,000 volumes have been printed, 27,000 of which have been bound, and the residue will be completed at an early day.

The Coast Survey Report is about half printed, and will probably not be completed for several months. 8,750 copies, with maps, are to be printed in quarto form.

The Smithsonian Report is nearly ready for the binder, and will be completed at an early day. It will make a single volume, 11,550 copies of which are to be printed.

Census Report, Part 1.—This volume will comprise about 800 quarto pages, of which 22,050 copies are ordered. The printing will be completed in a few days, when it will be placed in the binder's hands.

On the 12th of February, 1863, the House of Representatives ordered the printing of five thousand copies of the *Report of Captain Reynolds's Exploration of the Yellowstone River*, the manuscript of which has not yet reached this office.

With these exceptions, the printing of all the documents ordered at the last session of Congress has been completed.

The documents accompanying the message of the President at the commencement of the present session, although unusually voluminous, are being printed with as much despatch as the capacity of the office will admit of, and are in a much more advanced state than ever before at so early a period of the session. The printing of four volumes has already been completed. The bills, joint resolutions, and other matter required for immediate legislative action, are invariably printed and returned to Congress on the day succeeding that of their reception in this office.

The cost of the public printing executed during the year ending on the 30th of September, 1863, as compared with the amount the same printing would have cost under the printing act of 1852, will show the pecuniary advantage of the present system over the one which immediately preceded it. This comparative statement exhibits the following figures, viz :

The printing executed during the year ending on the 30th of September, 1863, would have cost, under the act of 1852, (see statement No. 1,) the sum of.....	\$566, 625 82
The total amount expended in the execution of this work, and the purchase of additional machinery, (see statement No. 2,) is	285, 664 80
Exhibiting a saving in expense of.....	280, 961 02

PAPER FOR THE PUBLIC PRINTING.

The seventh section of the present printing law directs the manner in which the paper for the public printing shall be procured, leaving little or no discretionary power with the Superintendent. The paper contracts, as the law requires, have all been awarded to the lowest bidders, after extensive and prolonged advertising for proposals, and considerable competition; and all the paper, with a few unimportant exceptions, has been procured from the contractors. The unusually large sum expended during the year ending on the 30th of September, 1863, has been caused by the greatly increased quantity of writing paper required for printing blanks, the large advance in the price, and by the necessity of having on hand a sufficient quantity to serve through the winter months, the want of which has heretofore seriously embarrassed the

operations of this office, and, on more than one occasion, entirely suspended the printing for a time. A detailed statement of the paper purchased, and the price paid for each particular kind, is appended hereto, (marked No. 3,) from which it will be seen that the whole amount expended is \$830,802 06, of which there remained on hand on the 30th September last quantities of all kinds amounting in value to the sum of \$253,372 38, showing the aggregate quantity consumed to be of the value of \$578,429 68. It is but a simple act of justice to acknowledge here the importance of the services rendered by the contractor for furnishing the writing papers. Large and frequent requisitions for paper have been made upon him at short notice, at a time when the ordinary channels of transportation were greatly interrupted or entirely closed, all of which were filled by him, regardless of trouble and increased expense, with a promptitude highly commendable.

LITHOGRAPHING AND ENGRAVING.

Wherever practicable to do so, this work has been given out by contract, after due publicity, to the lowest bidder. The whole amount expended during the year ending on the 30th September, 1863, was \$64,126 38. Of this sum \$13,826 04 was for the Senate; \$30,507 86 for the House of Representatives; \$19,395 11 (principally for parchment commissions, non-commissioned officers' warrants, and soldiers' discharges,) for the Adjutant General's office, and the residue in the execution of sundry small orders from other bureaus of the Government. A detailed statement of the work executed and paid for will be found appended hereto, marked No. 4.

THE PUBLIC BINDING.

Except for a short period during the last fall, when the workmen were on a strike for higher wages and a reduction of the hours of labor, the operations of the bindery have progressed in a satisfactory manner. The quantity of work required by the Executive Departments has increased with the creation of new bureaus and offices, and the enlarged operations of the Government; but it has been supplied with great punctuality. The prices of all the materials used in binding, like those in every other branch of business, have materially increased; yet, notwithstanding the cost of the work executed, as compared with the cost of the same work under the old system, will show a fair balance in favor of the former, as will be seen from the following statement :

The cost of the binding for the year ending on the 30th September, 1863, at the prices paid for work and materials of a similar character previous to the establishment of the Government bindery, would amount to (see statement number 6).....	\$302,760 19
The expenditures on account of this work have been as follows :	
Cost of materials, &c., on hand on the 30th September, 1862.....	\$22,000 00

Brought forward.....	\$22, 000 00	\$302, 760 19
Cash payments and indebtedness on the 30th September, 1863 (see statement No. 5).....	223, 945 80	
	<hr/>	245, 945 80
Difference in favor of the bindery.....		56, 814 39
Add cost of materials on hand September 30, 1863.....		23, 961 00
Add the cost of paper shavings, &c., sold and unexpended....		16, 692 72
		<hr/>
Showing a saving of.....		97, 468 11
		<hr/> <hr/>

RECAPITULATION.

The act of Congress establishing the Government Printing Office went into force on the 4th of March, 1861. The books of the establishment have been so kept as to show what the work ordered would have cost, if paid for according to the prices fixed by the law of 1852, and the *actual* amount of money expended in its execution. The result as thus ascertained from the 4th of March, 1861, to the 30th of September, 1863, is as follows:

Saving in cost of printing, from March 4, 1861, to September 30, 1861.	\$35, 407 86
Saving in cost on blank books and ruling.....	8, 084 60
Saving in cost of printing, from October 1, 1861, to September 30, 1862.....	99, 210 34
Saving in cost of binding and blank books, same time.....	62, 803 72
Saving in cost of printing, from October 1, 1862, to September 30, 1863.....	280, 961 02
Saving in cost of binding and blank books.....	97, 468 11
	<hr/>
Total saving since the establishment of the office up to September 30, 1863.....	583, 935 65
	<hr/> <hr/>

The character of the printing and binding, in material and workmanship, is superior to that furnished under any system which has preceded the present; and the experiment of the Government doing its own work, both as regards its quality and the economy of its cost, may be regarded as completely successful.

JOHN D. DEFREES,

Superintendent of Public Printing.

No. 1.

Statement showing the cost of the printing executed for the legislative, executive, and judicial departments of the government during the year ending on the 30th of September, 1863, at the prices established by the Printing Act of 1852.

Title or subject of document.	No. of pages.	No. of copies.	Cost under the act of 1852.
Portions of several documents ordered at the 2d session of the 37th Congress, which were unfinished on the 30th of September, 1862. (See Report of 1862, page 3)			\$29,501 48
